Announcement - 90th IUVSTA Workshop TEMTEM2023 on “Tuning properties of advanced energy materials using modern theoretical and experimental methods.”

Dear Colleagues,

The 90th IUVSTA Workshop will be held in Valencia, Spain, from December 16 – 22, 2023. We are pleased to invite you and your group members to participate in the WS virtually or in person, submitting your recent work as contributed talk or poster or simply as attendees.

See more details at the WEBSITE: <https://www.uv.es/temtem20/>.

The focus of the Workshop is on the broad manifold of materials characterization, presenting the state of the art of theoretical approaches, artificial intelligence, and experimental methodologies like advanced spectroscopies, optical, transport, and electrochemistry techniques.

Each plenary talk will present the fundamentals of tools to discover performant materials for conversion, harvesting and storage of renewable energies.

Please distribute this information to your collaborators and colleagues, you may think might be interested.

We are looking forward to seeing you December 2023 in Valencia.
