Dear IUVSTA Community,

Today, March 22nd, 2024, is UN World Water Day, a day to reflect on the vital importance of clean water for survival, prosperity and peace.

The theme of World Water Day 2024 is ‘Water for Peace’.

<https://www.un.org/en/observances/water-day>

Plasma, which is the focus of one of IUVSTA’s core scientific activities, is part of a toolkit that can take the “forever” out of the so-called “forever chemicals” that threaten our water supplies.

Read more in this Nature Outlook article:

<https://www.nature.com/articles/d41586-023-03876-9>

Do you do plasma-related research, or research aligned with any of IUVSTA’s core scientific areas, that you would like us to feature on our social media accounts? If so, please contact us on jennifer.macleod@qut.edu.au or petrov@illinois.edu.

We are interested in expanding our social media activity to include stories of how IUVSTA-related science is supporting scientific and societal progress and change, and we would love to hear your stories.

Jennifer MacLeod
